ABOUT

MediMatch protocols courses have been designed with you in mind. The aim is to assist our customers in expanding their skills and knowledge to achieve even better restorations.

We have carefully selected Key Opinion Leaders (KOL) who have specialised knowledge and experience in certain areas within the field. These KOL's will present each course.

In addition to this, MediMatch will host focus days for Medit, vhf, Exocad and 3D printers with specialised highly trained staff. These courses are aimed at those who are in the market and you want to learn how it can work for you, or you have purchased the product and are looking to expand your skills.

These courses will run throughout the year, further information for the exact dates can be found on our website.

MEET OUR KEY OPINION LEADERS

Dr Avik Dandapat

Dr Pedram Negahban

Dr Andrew El-Nazir

Dr Pavan Bopanna

Dr Daniel Flynn

COURSE LIST

- Telescopic Dentures Page 4-5
- Immediate Implant Placement Page 6-7
- Composite GC Injection Veneers Page 8-9
- Revolutionising Implant Dentistry: Mastering Model-free digital implantology Page 10
- Digital Endodontics Page 11
- Medit Scanning Course Page 12-13
- Exocad course Page 14-15
- Vhf milling course Page 16-17
- The Ultimate implant diploma Page 18-19

TELESCOPIC DENTURES

With

KOL Dr Pedram Negahban

DDS (Germany 2003), DiplmDent
RCS (Eng) Advanced prosthodontics,
implants, and cosmetic surgery.

COURSE DATES:

26th August 2023,
More dates may be added.

About the KOL

Pedram is actively involved in implant education, he is the current tutor of the FGDP Diploma in Implant Dentistry at the Royal College of Surgeons of England.

Pedram is proficient in all implant related surgical procedures including sinus lift, guided bone regeneration, and full mouth rehabilitations.

COMPOSITE GC INJECTION VENEERS

With
KOL Dr Andrew El-Nazir

DMD MFDS MSc Aesthetics (Kings),
Clinical lead Banning dental group,
Focus trainer, Smile Dental Group
lecturer, MediMatch Key Opinion
Leader.

With hands on experience, learn how to
fabricate composite veneers using the GC
injection technique.

COURSE DATES:

~~17th August 2023~~, 12th August 2023,
17th September 2023, 14th October 2023

About the KOL

Andrew is actively engaged in educating others in the GC injection veneer technique.

Andrew has a keen interest in aesthetics and finds it fulfilling to witness patients realise their desired outcomes.

020 3875 8530 | **MediMatch**
www.medimatch.com | **LABORATORY & SUPPLIES**

COURSE CONTENT

- Hands on experience.
- Why use GC g-aenial?
- An introduction to g-aenial and its properties.
- Composite veneers with gc g-aenial injection.
- How to restore occlusal surfaces.
- Stages of injection technique.
- How to photograph your cases to get best results.
- Communication with lab.
- Shape and sizes.
- Common problems.

HOW TO BOOK

Please book via our website <https://medimatch.co.uk/product-category/events/>

For queries regarding this course please email social@medimatch.co.uk

G-aenial Universal Injectable composite is both durable and aesthetically pleasing. It contains Barium particles and Silane Coating technology for extra strength and can be used for all cavity classes without an additional covering layer. It's high radiopacity makes it easy to detect secondary caries, and its highly thixotropic viscosity allows it to adapt to any clinical situation. It also offers excellent polishability and comes in 16 shades with three translucency levels for long-term aesthetics. The dispensing tips have a long, curved needle that can access difficult posterior cavities.

PRODUCT LIST

GC G-aenial universal injectable composite

GC EXACLEAR

EVE Diacomp plus twist

G-Premio BOND

GC Diapolisher Paste

The above products will be available for you to use on the day of the course.

CPD POINTS

5 hours of verifiable CPD.

MODEL FREE IMPLANTOLOGY

“AHEAD OF THE CURVE”

With
KOL Dr Pavan Bopanna

BDS DipDCSc (Lon) MFDS RCS (Eng)
Dip Imp Dent RCS Eng (Advanced),
MSc Restorative dentistry

COURSE DATES TBC
COURSE INFORMATION TO FOLLOW

About the KOL

Dr Pavan Bopanna is an experienced Implant Surgeon who focuses on Implant and Restorative dentistry. He completed the Diploma in Implant Dentistry from the Royal College of Surgeons of England at the advanced level and a Master's degree in Aesthetic and Restorative Dentistry from the University of Manchester.

He focuses on digital dentistry and model free Implant and Restorative dentistry reducing wastage and pollution without compromising on speed accuracy and aesthetics. He has done extensive work on conical retention to eliminate the use of cements and screws. His other main area of interest is to study the influence of modern materials on soft tissue profile and long term stability.

Pavan has been involved with digital implantology for 10 years. He is a principal dentist at The Butts Dental Practice in Brentford, West London. He is the course director of the Diploma in Advanced Implant dentistry at the Academy of Practical Advanced Dentistry (PAD-Academy.co.uk).

DIGITAL ENDODONTICS

With
KOL Dr Daniel Flynn

BDentSc Dubl 2002

COURSE DATES TBC
COURSE INFORMATION TO FOLLOW

About the KOL

Daniel Flynn is an accomplished dentist specializing in endodontics. With a distinguished academic background from Trinity College Dublin, he gained practical experience at Dublin Dental Hospital before moving to London. At the prestigious Eastman Dental Institute, Daniel completed a three-year training program in Endodontics.

As a leading expert in his field, Daniel utilizes advanced techniques and cutting-edge equipment to achieve outstanding results. He accepts referrals from general dental practitioners, self-referrals, and complex cases from other endodontists.

Beyond his clinical work, Daniel actively contributes to dental education. He provides lectures, conducts hands-on courses, and serves as a mentor to fellow endodontists. His expertise has made him a sought-after guest lecturer at renowned dental conferences and events. Notably, he was a speaker at the inaugural International Endo Masters online congress. Since 2012, Daniel has organized his own successful hands-on courses and online teaching programs, further enhancing the professional development of dentists specializing in endodontics.

SCANNING COURSE

Scanning is the first and crucial step to opening yourself up to the digital workflow with a high quality scan then enabling you to design and mill the restoration to your exact needs with the ultimate outcome enhancing the level of treatment within your practice.

This course will provide you with a full understanding of the Medit Link system. This will include hardware management, case creation, tools and Medit apps.

On completion of the course, the new user will feel comfortable scanning a patient, creating temporary crowns, performing an ortho simulation and ordering a case with the lab.

There will be plenty of opportunities to ask questions, enabling the trainer to tailor the course to your specific needs.

Course led by Medit specialist David Cruickshank

David Cruickshank

Graduating in 2008 with BSc (Hons) Dent Tech, David has spent the last 15 years pursuing his interests in dental CAD/CAM technologies. Specialising in Scanning, 3D printing, Milling and Direct Metal Sintering. David is responsible for training new Medit users and guiding them through the digital journey.

COURSE DATES:

29th July 2023
5th August 2023
2nd September 2023
7th October 2023
4th November 2023
2nd December 2023

Get the power to take your practice to the next level

exocad

DESIGN COURSE

COURSE DATES:

30th September 2023

16th December 2023

Course led by Exocad specialists

Exocad software plays a crucial role in allowing you to design your restorations to fit your patients exact needs as well as being a key part of the workflow which is simple to use thanks to the effectiveness of an open system which enables compatibility with multiple scanner types.

The focus of our course will be on the latest Exocad design software with a live run through and tutorial on the following:

- Crown/inlay/onlay
- Multi unit Bridge
- Maryland
- Vaneer
- Bite splint
- Denture
- Smile Creator
- DentalCAD
- Add on Modules
- Dentalshare

Godwin Kulasingam

Godwin is a highly skilled professional, renowned for his expertise as a MediMatch VHF product expert and Exocad specialist. With a solid foundation as a Structural Engineer, Godwin holds a Bachelor's degree in Civil Engineering (BEng) and a Master's degree in Structural Engineering (MSc).

As an Exocad specialist, Godwin possesses in-depth knowledge of this cutting-edge dental CAD/CAM software, enabling him to leverage its capabilities to their fullest potential. His expertise encompasses designing and creating dental prosthetics using Exocad, thereby contributing to the precision and efficiency of dental workflows.

MILLING COURSE

COURSE DATES:

28th October 2023

Course led by vhf specialist Godwin Kulasingam

The manufacturing process in the digital workflow is one of the most important parts in creating a perfect restoration. The main element in this is having a machine which fits your needs with a simplified integration regardless of your system. VHF has a variety of machines across their portfolio which we are able to show you with our technicians and machine experts.

Among the course contents are:

- Basic knowledge of vhf dental machines
- Basic knowledge and understanding of vhf tool types
- Basic production workflow

Software operation:
Working with DENTALCAM & DENTALCNC

- The Service section of dentalportal.info
- Delivery, installation & commissioning
- Briefing of Software operation, machine operation, basic maintenance
- System troubleshooting & repair

Godwin Kulasingam

Godwin is a highly skilled professional, renowned for his expertise as a MediMatch VHF product expert and Exocad specialist. With a solid foundation as a Structural Engineer, Godwin holds a Bachelor's degree in Civil Engineering (BEng) and a Master's degree in Structural Engineering (MSc).

Having worked at MediMatch for two years, Godwin has developed an exceptional understanding of the intricacies of the dental industry. During his tenure, he focused on handling VHF machines, gaining valuable hands-on experience and becoming proficient in their operation.
